## Power to live your life

“What an amazing product, real change is so hard to achieve and takes so long but Taking Back Your Power helped me bring 67 years of life together. I am complete, three pieces made one, I feel the person I was meant to be.” Dorothy. B

“I feel so incredibly centred; I have spent a lifetime searching for me, from martial arts and meditation to religion and philosophy, I didn't know it would be so easy or fast. Taking Back Your Power worked the first time and it continues to build every time I use it, Now I am going to take this car out and see how she runs.” John

“I'm motivated and dynamic and above all else happy and relaxed. I have spent the last 6 years studying religion and personal development to try and find some answers to try and achieve the same result as listening to the CD ONCE! The more I listen to the CD the more it has a compounding and reinforcing affect. It's like having your bank account with a 1000% compounding interest! I recommend it to anyone who wants to live a more full and happy LIFE! Which is everyone!” Adam. L

“I feel like I have contacted the essence of my childhood that was lost so long ago, and the future has opened with possibilities instead of a long dark path.” Helen

“The audio program was nothing short of excellent; I'd never experienced a trance like state before and it was a deeply moving experience.” Matt

## Power to live your life

### *Transcendental technology*

The use of transcendental technology in the compilation of this CD allows the left and right hemispheres of the brain to come into balance. When listening to the CD through stereo headphones, you will hear four different sound streams. These have been programmed specifically to allow your subconscious mind to receive and absorb the powerful messages contained within this program. There no need for subliminal messages, it's how our brain is wired to work.

### *Frequently asked questions*

**Q When should I use the CD?**

A The CD can be used at any time of the day, as long as you will not be disturbed for 29 minutes. The best time is at night, just before sleep. This CD is **not** to be used whilst driving or operating machinery.

**Q How often do I need to listen to the CD?**

A The choice is yours, however most people benefit from three to five days a week. Once you lift one layer, another layer may relieve itself, so keep going until you feel you have achieved the desired result. If you feel overwhelmed, rest for two days before recommencing.

**Q Which audio stream do I listen to?**

A The CD contains four different audio streams. To gain the most from the experience relax, and allow your mind to be free. Don't worry about choosing the 'right' stream; your subconscious will process the information. Simply enjoy the feeling of wellbeing as your mind is pushed to higher states of mental performance and consciousness.

**Q How do I use the CD?**

A Stereo headphones are required to ensure the information is transferred to the correct brain hemisphere. Use the R earpiece in the right ear, L in the left ear.

**Q Can I transfer the CD to an MP3?**

A Yes, the CD can be downloaded to an MP3 however copying may reduced the sound quality, and hence the potency and effect.

**Q Should I be setting goals before listening to the CD?**

A Most people benefit from writing down what they want to release and achieve from the CD, however this is not absolutely necessary as the information is absorbed subconsciously to build your mental and emotional power.

**Q I have strange dreams after I listen to the CD?**

A This is quite normal, as your subconscious mind is either releasing or trying to send you important information. Write down your dreams immediately upon awakening. Remember however, all dreams are symbolic. If you require further information or guidance email us at [info@caresforyou.com.au](mailto:info@caresforyou.com.au)

**Q I keep falling asleep when I listen to the CD, does this matter?**

A Don't worry if you fall asleep. The information is still reaching the right brain channel subconsciously. Most people report a better quality of sleep and feel more centered.
